NYT Research Projects

An NYT research project teaches you research

- By applying a research method
- To a real research question

Ways to fit a research project into your degree program

- NYT-PROJ = 5 ECTS research project only
- NYT-VUE-PROJ = 10 ECTS basic course + research project

This Semester's Projects

Find the project descriptions

- Through <https://uni1.de/nyt/index>
- At [NYT-17 Project Descriptions \[Public\]](#)

Systematic Review

Perform a systematic review on a given topic using your instructions

- See the systematic review playbook

Choose a review topic and develop your own research question

- See the project descriptions

Deliver your systematic review in two-week increments

- See the course schedule

Project Grading

#	Deliverable (Homework)	Value [1]	Weight
1.	Research design	[0 1 2 3]	15%
2.	Design review	[0 1 2 3]	5%
3	Study search	[0 1 2 3]	15%
4.	Study filter	[0 1 2 3]	15%
5.	Initial analysis	[0 1 2 3]	25%
6.	Final analysis	[0 1 2 3]	25%

[1] See <https://oss.cs.fau.de/teaching/course-resources/grading-schemes-and-scales/>

0. Get Started

Read the Systematic Review playbook

- Find all materials in the [NYT-17 Systematic review project folder \[Public\]](#)

Prepare questions for class discussion

1. Research Design

Create a private copy of the Report and Database template files

- Change title word “Template” to “LASTNAME, First name” e.g. “RIEHLE, Dirk”
- Remove any “Copy of” leftovers from title

Adjust files as you see fit for your research design

Set version of private files (Report, Database) to “Research Design”

Create a copy of your private files and move them to **1. Research Design** folder

- This must be a static copy, not a link (we want the copy not to change any more)
- Also create a PDF from your private files and upload by the deliverable deadline

Get started on your study search

2. Design Review

Read the research design of everyone else in your cohort

Write a one paragraph feedback of each design

Upload feedback to 2. Design Review folder

3. Study Search

If necessary, adjust your research design based on the feedback as you see fit

Perform study search

Save PDFs to private folder, name them using the publication reference

Set version of private files (Report, Database) to “Study Search”

Create a copy of your private files and move the copies to **3. Study Search** folder

4. Study Filter

If necessary, adjust your research design as you see fit

Perform search and quality filter

Set version of private files (Report, Database) to “Study Search”

Create a copy of your private files and move the copies to **4. Study Filter** folder

5. Initial Analysis

If necessary, adjust your research design as you see fit

If necessary, reperform search and quality filter

Perform statistical analysis of meta-data

Create a QDAcity project with your documents

- Create your initial qualitative data analysis
- Share your QDAcity project with riehle@group.riehle.org

Set version of private files (Report, Database) to “Initial Analysis”

Create a copy of your private files and move the copies to **5. Initial Analysis** folder

6. Final Analysis

Finish your qualitative data analysis

Write your synthesis section in the review report

Set version of private files (Report, Database) to “Final Analysis”

Create a copy of your private files and move the copies to **6. Final Analysis** folder

Upload a zip-file of your PDF folder to **7. Studies (PDFs)**

Thank you! Any questions?
